

# shuttleTower® – the cassette (cassettesShuttleTower)

# shuttleTower® – the cassette (cassettesShuttleTower)

## Transportation unit

universal-stack-cassette for the shuttleTower – push in-store and the shuttle operation to use with crane

## Access frequency Ø for one transport unit (number of accesses / time to use up)

low ( $\leq 3$  access / day)

## Store-loading and unloading of the cassettes

by use of forklift / stacker

## Loading the cassettes up to 7 tons payload

a) by use of PalEx with or without pallet with alternatively simultaneous depalletizing by use of stacker or hall crane

b) by use of heavy weight –belt traverse or load hook with or without pallet per by use of stacker or hall crane

## Single tin withdrawal

by hand after lifting up by stanchions (e.g. via PalEx) or by use of manual or automatic working crane-vacuum- respectively vacuum technique at the machine

## Measurement and static

in case of requirement

## Compartment height

plug-in 75:75 mm

## Ability to stock up

in series

## High efficiency

45 %

## Standing time

unlimited (indestructible)

## Maintenance

maintenance free

## Operation

for inside and outside use

## Options

a) roof- and wall – constructions

b) integrated crane-vacuum-technique => masterTower®

## LaserPointNavi (WLAN-Navigation for tasks for material-attachment-on call-supply-return-management)

yes
